

Vaccination record card

Never wonder which jab is next. Write the date and clinic after each visit, and book the next one before you leave. The rows follow Singapore's National Childhood Immunisation Schedule.

Child's first name _____ Usual clinic _____

Age	Scheduled vaccines	Date given	Clinic	Next visit
At birth	BCG (tuberculosis); Hepatitis B dose 1			
2 months	6-in-1: DTaP, IPV, Hib + hepatitis B dose 2			
4 months	5-in-1: DTaP, IPV, Hib dose 2; Pneumococcal (PCV13) dose 1			
6 months	6-in-1: DTaP, IPV, Hib + hepatitis B dose 3; Pneumococcal (PCV13) dose 2; Influenza yearly, under 5 years (first time: 2 doses 4 weeks apart)			
12 months	MMR dose 1; Varicella (chickenpox) dose 1; Pneumococcal (PCV13) booster			
15 months	MMRV: MMR dose 2 and varicella (chickenpox) dose 2 in one jab			
18 months	5-in-1 booster: DTaP, IPV, Hib			
10 to 11 years Primary 5	Tdap-IPV booster (one jab). Given at school			
12 to 13 years Secondary 1	HPV dose 1 (for girls). Given at school			
13 to 14 years Secondary 2	HPV dose 2 (for girls). Given at school			

1 Yearly flu vaccine, 6 months to under 5 years

The first time a child aged 6 months to 8 years has the flu vaccine, the NCIS gives 2 doses 4 weeks apart. After that it is 1 dose a year.

Dose	Date given	Dose	Date given
First time, dose 1		Season 2	
First time, dose 2		Season 3	
Season 4		Season 5	

Other vaccines and visit notes

Record anything your doctor recommends beyond the national schedule, and the questions you want to ask at the next visit.

① Other vaccines

Vaccine	Date given	Clinic	Next dose

Questions for the doctor

Reactions we noticed

Write what you saw and when, and tell your doctor.

② Good to know

- Doses from Primary 5 onwards are given through the school-based health programme.
- Some children with specific medical conditions need extra vaccines, such as PPSV23, a yearly flu vaccine from 5 to 17, or COVID-19 vaccination (from 12 October 2026, for medically vulnerable children from 6 months). Your doctor will advise.
- From 1 January 2027 the Secondary 1 and 2 school programme gives girls the HPV9 vaccine instead of HPV2, still two doses.
- Nationally recommended childhood vaccines are subsidised for eligible Singapore citizen children at polyclinics and CHAS GP clinics, and for PR children at polyclinics; ask your clinic what applies to you.
- Your official records are kept by your clinic and on the National Immunisation Registry. Keep your Child Health Booklet with this card.

A record to fill in, not medical advice. Ages are the scheduled ages; your doctor may time doses differently for your child. Discuss any question about vaccines with your doctor.
